Tree of Life, Human DNA, theory of universum, vortex field.

ABSTRACT

In this paper is described the explanation that the real life tree of different civilizations is represented by human DNA based on THEORY OF THE UNIEVRSUM developed by Prof. Mariola Gariova and Prof. Lord Momtchil Döbrev - Halachev in the Year 2005, Basics of the Cosmological Theory of Information and Vortex Field Theory developed by Lord Prof. Momtchil Döbrev - basic structure of the unionvrsum ".

INTRODUCTION

The explanation of the ancient tree of ancient life proves that the petty ones knew the DNA, how many DNA threads the human had, what the DNA of the human, spiral, and far outpaced the discovery of scientists Watson and Crick who discovered the structure of DNA - the double helix. 1991 Lord Prof. Dr. Momchil Dobrev creates his theory of vortex fields and Cosmological information theory. The explanation of how information and energy is transmitted on what paths, on what fields, based on Momchil Dobrev's theory of vortex fields and cosmological information theory, is a new reading and proof of what the tree of life is painted and painted by the ancient 3000 to 12000 BC. Stepping on his theories Lord Prof. Dr. Momchil Dobrev firmly states that the ancients were familiar with the human DNA structure, they knew how human DNA was engineered, how information was transmitted, what fields, how to transfer energy and information to the DNA - the human chain. This article describes a comparison of the described and painted structures of the Tree of Life of the Ancients and their explanation according to Momchil Dobrev's theories of spreading information on the DNA chain, reading and spreading the energy on human DNA. on the basis of the theory of vortex fields of Lord Prof. Momchil Dobrev and the theory of Lord Prof. Momchil Dobrev, "Cosmological Theory of Information", created by rcm cx 1991 , when Dr. Prof. Dr. Momchil Dobrev created the first

two free energy generators in the world.. 2). Basics of the THEORY OF THE UNIVERSUM developed by Prof. Mariola Gariova and Prof. Lord Momtchil Dobrev – Halachev in the yyear 2005, basics of the Cosmological theory of Information and Vortex Field Theory developed by Lord Prof. Momtchil DOBrev 1991 Momchil Dobrev Dobrev creates Cosmological theory of information (Dobrev, 2009) and theory of vortex fields (Dobrev, 2012) - the basis of everything. In the same year Momchil Dobrev created two free energy generators using the theoretical and practical solutions of both theories, creating prototypes, but actually refusing to start regular production because he knows that all scientists and inventors create such generators soon after they are killed. The real vortex theory proves the existence of swirling fields in the fabrication of matter at the lowest to the highest level, starting from the atomic structure, to the construction of star systems, galactic systems of the universe. On the other hand, the vortex fields are also present in the construction and functioning of the human body.

On the other hand, the cosmological theory of information proves that vibrations are the basis of the existence of all objects in the universe and man in particular. Even at the cellular level there are precisely defined vibrations of precisely defined frequencies and frequency spheres. Each cell, even every organ vibrates with exactly the same frequency when it is in a state of health and certain other ones when it is in a disease state. The deviation from the interval norm of the "healthy" body vibrations proves the opposite that the body is sick. In February 1985, Momchil Dobrev, under the leadership of Professor Karl Heinz von Gotte, found

superconductivity, but because of the intervention of a Bulgarian state security agent then working at the Berlin embassy in Berlin and the US CIA, stealing materials and betraying them, but Momchil Dobrev Dobrev refuses, is forbidden to publish the discovery. So 1985 because of State Security cop Prof. Gote and Momchil Dobrev are not awarded the Nobel Prize in Physics. The Nobel Prize in two years has been given to two scientists from Switzerland to discover superconductivity in September 1985. - seven months after Prof. Gote and Momchil Dobrev. The vortex fields actually carry, distribute, create both information and energy. There is actually a conversion of information into energy and vice versa. In fact, on the basis of the theory of the vortex fields, the passage of the material in the process of materialization and dematerialization is undisputed, in which the processes do not lose the information. On the other hand, the vortex fields are the basis of matter and antimatter. Swirl fields emit vibrations precisely defined and at specified intervals. This is the relationship of the vortex fields with the cosmological information theory. Three distinct principles apply to each swirling system: There is a force that is at the heart of the whirlwind - in its center, and it controls the entire structure. For each imi structure swirling forces that cause the structure to strive for center, swirling forces that cause the structure to strive for external propagation, and a separate force that prevents objects from the structure from leaving the structure itself - that is, has the force of limiting the size of the structure. Vortex structures are also hurricanes. In the center of hurricanes is peace. There are chakras in the human body both at the physical level and at the other two levels, which besides supplying information and energy to the respective glands and levels and organs at these levels, but it also raises the energy to the highest level.

The whirling structure that radiates the corresponding vibration - its section Light is a vortex. Each electromagnetic wave is a whirl, the point at which both the electric field and the magnetic field are the zero point. Moreover, the space generating the vortices is geometrically based on the golden section, the numbers phi and pi. Electromagnetic wave is a whirlwind in a straight line. A basic element in the cosmological theory of information is also to note the basic principle. The single field covers and is based on vortex fields. The dissemination of energy, of information becomes unique with the swirling movements in a spiral way - right rotation. This is the easiest way to predict energy and information in the universe. That is why it is the connection of information and energy, ie. both are transmitted in the same way. Only this is the way of spreading energy and information - the vortex fields. Energy and information are not distributed on STRUMENTS. THE VORTEX FIELD and its forms are THE BASIS OF THE SINGLE FIELD. The vibrations had a swirling structure. Only the vortex structure can spread in one space - in this case the Cosmos. Spreading information into space is purely a whirlwind principle. The two theories prove that real human thought can be both a carrier of both information and energy and cause changes at the material level and at the spiritual level. There are 12 dimensions of consciousness, the basics of which are types of vortex fields. Only On the first density level (first, second and third dimension) lies our incarnate self. At each density level corresponds a certain type of matter and type of consciousness - that is, an information field with an information structure for the relevant plurality level. Our first harmonic universe, or that of Earth, we have a biological structure that is based on

carbon and matter is on a physical level. In the depths of a harmonious universe where our souls inhabit, there is a silicon-carbon biological structure, and matter is on a physical-etheric level, also called a semi-etheric level. In a third harmonic universe, the creatures are composed of crystalline silicon and the matter of net is entirely etheric. The biological structure of the fourth harmonic universe, where the current levels of consciousness or the state of its current state are found, is a "crystalline liquid light," and the particles at that level are called premastery. Dimensions 13, 14 and 15 at five density levels are composed of antimatter (other than antimatter) and the biology of the beings there is called "crystalline light radiation". At the three levels above this dimension, namely polaris, triadic and ecuatec levels, the beings are of pure consciousness and these levels are not considered dimension. Our soul includes us and eleven incarnated personalities, or a total of twelve people. Our soul together with another 11 people forms our air. Accordingly, the smell is composed of 144 incarnated personalities. Twelve halves make up the Christ avatar, which includes 144 people and 1,728 incarnate personalities.

Accordingly, 12 Christ avatars are connected and make up one rhesus adept. The relics of the Adept include, in turn, a further 144 breaths, 1,728 people and 20,736 incarnate figures. All 12 personalities of the soul are placed in the so-called time vector. They are arranged as the clock on the dial is marked. In this way, 6 pairs of born persons are formed. These are 1 and 7, 2 and 8, 3 and 9, 4 and 10, 5 and 11, 6 and 12. Most energy is allocated to pairs 12 and 6 as well as to pairs 3 and 9. These personalities are called "((the ethics" faces of the soul ". Most often position 12 is a man and position 6 is a woman. They have the same DNA template. Clearing the link with your own avatar helps strengthen everyone's biofields and creates protection from negative intrusions up to 12 dimensions. The avatar is part of the multidimensional identity structure and corresponds to Mahara - this is the body of the fourth harmonious universe. The avatar includes the 10 dimensional mind, the mind of the 11th dimension and the nirvana mind of the 12th dimension. Avatar avatance is a 12-dimensional level of consciousness that can be achieved at the biological level with full activation of a 12-stranded DNA template. In catara, this DNA template is called a genetic footprint of the tagged matrix as well as DNA. When one integrates its avatar level, it changes its perceptions of time space and matter and submits the so-called multiverse consciousness of the 12th dimension. Multiverse consciousness is an enterprise and an ability to interact with our minds, souls, and our personalities, who are in different spatial-temporal realities 8 years ago in the past or the future / The iovidvid becomes capable of moving freely between the 12 dimensions - to ascend and descend into the four density levels.

This gain is possible after activating the 12 levels of DNA template threads. Another ability that the avatars have is to have a galaxy's memoir. This awakening is synchronized with raising the vibration of a morphogenetic field, and most avatars are awakened to levels when the vibration of the paid one rises. Initially the integration of human identity took place in a life like human form, it was eternal, and the person did not die, but ascended to a higher harmonic universe. This passage has occurred with the physical body through which the process of atom transmutation takes place. Because of the deformations in the morphogenetic field of the Earth,

deliberately conceived by other stellar rays, this process was the precursor, and people's lives began to be realized by successive incarnations. The reincarnation was not the evolutionary process of the human race, but it began to work more than five and a half million years ago.

Levels of consciousness - an aspect of myself

- physical level, physical body, survival instincts
- Emotional, sexual, emotional,
- will - intellectually, rationally logical - ego - lower mind.
- Mental, Intuitive, Creative, Astral - Higher Mind.
- Love, union, the only, etheric - heart light body
- causal level, vicious life - causal body.
- Pure Essence Higher Self - Soul
- Higher reason wisdom, knowledge - superstitious
- Celestial Consciousness - Monad
- Cosmic consciousness - Christ / Buddha essence
- Intergalactic consciousness - individual and divine essence
- Universal consciousness - a universal divine essence.

Beyond the 12th great mystery the emptiness - divine consciousness / peaks god.

Flexibility

- material kingdom
- level - plant
- animal - animal
- level - human beings.
- level - etheric light body
- level - causal body
- level - the soul, the angels
- level the superstition, the archangels
- Level Monad, Ascended Teachers.
- level - the great central sun.
- level of all-galactic universe.
- level - gods creators.
- level - divine consciousness the emptiness, the unknowable.

Achieving a higher state of consciousness is associated with making a change in density, ie. evolving from a form of life from a lower order to a higher-form life form.

Dimensions

- level - coaching
- level location
- level depth, size, physical plan.
- level-time thought, asparagus
- level-love, the only, planetary plan
- level-causal plan, acoustic records.
- plan of the house, low heavenly spheres.
- the supernatural, intermediate celestial divisions.
- monad, high heavens.
- Paradise / Worshiping Worlds.
- The universe
- other universes
- divine consciousness.

COLORS of corresponding levels of consciousness and corresponding levels of dimensions

- Red Level
- Orange level
- Level - Yellow
- Level - Green
- Level - Pink Higher Heart
- Level Blue - Throat
- Level - Indigo - third eye
- Level - Violet - the crown of the head
- Level - Silver - over the crown
- Level - Gold - Christ's self
- Level White - Divine self
- Level Clean - universal essence
- Level Black - the emptiness.

3. The Tree of Life in Artifacts from India, Egypt, Sumer, Turkey and the Relationship with THEORY OF THE UNIVERSUM, the Cosmological Theory of Information, Theory of Vortex Fields, developed by Prof. MMriola Garibova and Prof. Lord Momtchil Dǎbrev - Halachev in the year 2005 LIKE LIFE and DNA of man - complete comparability The tree of life represented in different civilizations is a form of DNA, a double spiral whose rotation is in motion in the opposite direction in a clockwise fashion. The Tree of Life represents the DNA of man and human being. The DNA spiral is double and counter-clockwise. Reading information from DNA is in this and the only direction. This is the direction of reading and writing information. The serpents show the power generation and the direction in which the information is read. The Tree of Life exists in all civilizations, but the most popular image is the two snakes wrapped around an axial rod dating from before 2000 BC. - The Sumerian deity Ningizzida. It is accompanied by two Mushas. Fig. 1 Fig.2. The name Ningizzida in Sumerian translates as "the master of the good tree". According to Sumerian iconography, this is a combination of both the idea of protecting the tree - that is, the DNA of man on the earth spirits / snake /, and the winged spirits - heronims. On Fig.3, it is a tile of Göbekli tepe from 12 000 BC. In this case, the tree of life is between two snakes - that the double-stasis of DNA. Fig. 4 shows the Sumer statue. On Fig. 5 are the statues of Assyria, Egypt, and Urttu, in which winged Cherubim "Spirit-Defender" bury the tree of life. This proves that human DNA must be vigilant. On Fig. 6 is presented the Tree of Life of Urthartus, ninth century BC in today's Armenia - Assyria. On Fig.7. is presented the tree of life in the temple of Karnak in Egypt. There are 12 threads on all presented trees of life, proving that even the early 12,000 BC. They knew that DNA is a twin spiral with twelve dimensional threads of consciousness. Wings of wings keep the Tree of Life. There are 12 dimensions of consciousness, the bases of which are types of vortex fields, and therefore there are 12 threads in the field structure of human DNA. The DNA spiral is double and counter-clockwise. Reading information from DNA is in this one and only direction. This is the direction of reading and writing information. Snakes show the generation of the power that reads the information. This is the direction of energy generation by maintaining the swirl fields of an THE REAL TREE OF LIFE is an image of human DNA. And in Assyria and in Babylon, the cherubim perform the functions of a protector of the Guardian of the Tree of Life. Life's life is actually two wrapped two snakes in each other.

Fig1

Fig 2

Fig3.

Fig4.

Fig 5.

Fig 6.

Fig7

It really is the human DNA. In reality, however, the Sumerian deity, Ningizida, is crowned by two gryphons. This is the oldest known image of two snakes wrapped around an axial rod dating back to 2000 BC. The image of the Tree of Life, protected by air and earth spirits, is from 9 000-12 000 years ago from the Neolithic Göbecki Tepe, Asia Minor. The Tree of Life protected and protected by the Earth - / snake7 and the sky / spp /. The second tile of Goebbekli tepe The tree of life is between two snakes. The serpent is the movement of the VIRUS FIELDS. TWELVE - the six double strands prove the existence of a 12 dimensional dimension - a stretch - 12 dimensions of human DNA. This 12 dimensional DNA is naturally preserved by snakes - the movement of energy. In Figure 1, 2 3, the energy movement from the bottom to the top.

Conclusion

This article shows that the real life tree represented in the different civilizations is an image of human DNA - the double helix with the rotation - reading and writing of the information counterclockwise, with respectively 12 filaments that correspond to the 12 dimensional dimension and spread in the universe.
